

SteelNova Industries

Technical Brochure 2026

Company Overview

SteelNova Industries manufactures precision industrial products designed for demanding environments.

Engineering Capabilities

Advanced CNC machining, fabrication, welding, pressure testing, CAD/CAM support and quality inspection.

Materials

Carbon Steel, Stainless Steel 304/316, Duplex Steel, Alloy Steel, Brass and special alloys.

Manufacturing Process

Design → Material Inspection → Machining → Welding → Surface Treatment → Quality Inspection → Dispatch.

Technical Standards

ASME, ANSI, ASTM, DIN, BS, ISO and customer specifications.

Quality Assurance

Raw material inspection, dimensional inspection, hydro testing, PMI, NDT and final QA approval.

Applications

Oil & Gas, Chemical, Petrochemical, Water Treatment, Power Plants, Food Processing and Marine.

Typical Specifications

Pressure Class: 150–2500

Temperature: -46°C to 650°C

Sizes: 1/2"–48"

Custom manufacturing available.

Support

Engineering consultation, OEM manufacturing, documentation, test certificates and global logistics.

Technical Summary

Feature	Details
Design Software	AutoCAD, SolidWorks
Inspection	Hydro Test, PMI, NDT
Materials	CS / SS / Alloy Steel
Standards	ASME, ANSI, ASTM, DIN
Delivery	Worldwide
